DETAILED ACTION

This action is in response to the papers filed 3/3/09.

Claims 1-8 and 12 are under consideration.

This application contains claims 10 and 11 drawn to an invention nonelected with traverse in the reply filed on 4/13/05. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Rejection Withdrawn

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-8, and 12 were rejected under 35 U.S.C. 102(b) as being anticipated by Lezdey (US 5,532,215, previously cited and discussed in prior actions).

Applicant has amended the claims and the rejection is withdrawn.

Rejection Necessitated By Amendment

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lezdey (US 5,532,215).

Applicant argues that clinical conditions now recited in claim 1 cannot be treated by prohibiting herpes proliferation, that these conditions once established become independent of the virus, and that it would not be obvious to treat conditions “**not**” (applicant’s emphasis) associated with viral proliferation with AAT.

Applicant’s arguments have been fully considered and not found persuasive.

The claims require a method of treating a clinical condition associated with herpes infection. The claims do not require that the condition is independent.

The amended claims do not exclude treating the herpes infection to treat associated diseases or preventing the outbreak of associated diseases.

Thus, it would have been *prima facie* obvious to treat herpes associated diseases by treating herpes as taught by Lezdey with the expectation of success because Lezdey teaches how to treat herpes and associated conditions with AAT peptides.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
